

Cost Estimator

BASIC RESPONSIBILITIES

Under the direction of and reporting to the President this position is responsible for:

- The preparation of price quotations (labour hours and material) for the complete build/repair of plastic injection moulds and other services as provided by the Company

NATURE AND SCOPE

The position of Estimating coordinator is a salaried position with weekly hours of work that will inevitably fluctuate but will not be limited to what is required to provide services to requesting colleagues.

Must be able to determine the following:

- line of draw;
- the method of introducing material to the cavity;
- the parting line;
- any mould or die movements independent from mould opening or closing e.g. lifters or slides;
- cooling system;
- ejection system.

Once this "mould concept " has been established and reflects the specific customer standards, the Estimator must estimate provide a quotation of labour hours and material required to produce a finished product as requested by the customer.

The Estimator will also need to be able to manipulate an plot CAD data independent of the design group, as well as have good skills with Epicor, Windows and Microsoft Office based software.
